

QUICK ORDER FORM

The Symbiosis Custom Library for the Biological Sciences Customizable Lab Manual for Tortora/Funke/Case, Microbiology, 10/e

The table on the following page lists labs from *Johnson/Case, Laboratory Experiments in Microbiology, 9/e*. These full-color labs are designed to complement *Tortora/Funke/Case, Microbiology: An Introduction, 10/e*. You can quickly select labs from this list to create a custom laboratory manual that meets your specific lab course requirements. Simply check off the labs you wish to include and indicate the sequence in which you would like them to appear. If you wish to add other labs from the Symbiosis selection guide, write the author and lab title for each one in the space provided. Then **fax this form** to us at **617.671.2923** or mail it to the address given below. A **free evaluation copy** of your custom lab manual will be shipped to you in 10-14 business days.

Note: Your evaluation copy will come with an ISBN for ordering through the bookstore printed on the back cover. You will also receive an email with a PIN code to use when you log in to our BookBuild site. You have the option of adding or deleting labs from your sample manual by contacting us at **1-800-777-6872**. For a complete list of all the labs available in the Symbiosis custom library, request a free selection guide at customlibrary@pearson.com.

Your Name _____ Department _____

School _____ Address _____

City _____ State ____ Zip _____ Office Phone _____ Fax: _____

Email _____ Course Name _____ Course Number _____

Number of Sections _____ Term (select one) _____ Fall _____ Winter _____ Spring _____ Summer

First day of classes for the term you will use this book _____

Total enrollment for sections using this text _____ Total number of desk copies for faculty this term _____

NOTE: Because there will be no standing inventory, faculty desk copies can only be provided when an initial or reprint order is placed by the bookstore.

Date you expect to place your bookstore order _____ Bookstore Phone: _____

Name of bookstore and contact person _____

Would you like to order your custom manual shrink-wrapped with one or more Benjamin Cummings textbooks for a 10% discount off the lab manual net price? Please give us the author, title, edition, and ISBN of the textbook(s).

What would you like to appear on your customized title page? (Up to 5 lines of text)

Check your preferred cover choice: Red/Collage with shell, berries, microorganisms (SYMB08-1) Red/Twigs with red berries (SYMB08-2) Tan/Butterfly (SYMB08-3) Brown /Collage with mushrooms, starfish, microorganism (SYMB08-4) Light Blue / Microorganism (SYMB08-5) Light Green / Mushrooms (SYMB08-6) Purple / Microorganisms (SYMB08-7) Brown / Shell (SYMB08-8) Brown / Starfish (SYMB08-9)

Check To Select	Sequence	Labs from Johnson/Case, Laboratory Experiments in Microbiology, 9/e	Lab Code
		Use and Care of the Microscope	BCSYM1620
		Examination of Living Microorganisms	BCSYM1621
		Microbes in the Environment	BCSYM1622
		Transfer of Bacteria: Aseptic Technique	BCSYM1623
		Preparation of Smears and Simple Staining	BCSYM1624
		Negative Staining	BCSYM1625
		Gram Staining	BCSYM1626
		Acid-Fast Staining	BCSYM1627
		Structural Stains (Endospore, Capsule, and Flagella)	BCSYM1628
		Morphologic Unknown	BCSYM1629
		Isolation of Bacteria by Dilution Technique	BCSYM1630
		Special Media for Isolating Bacteria	BCSYM1631
		Carbohydrate Catabolism	BCSYM1632
		Fermentation	BCSYM1633
		Protein Catabolism, Part 1	BCSYM1634
		Protein Catabolism, Part 2	BCSYM1635
		Respiration	BCSYM1636
		Unknown Identification and Bergey's Manual	BCSYM1637
		Oxygen and the Growth of Bacteria	BCSYM1638
		Determination of a Bacterial Growth Curve: The Role of Temperature	BCSYM1639
		Biofilms	BCSYM1640
		Physical Methods of Control: Heat	BCSYM1641
		Physical Methods of Control: Ultraviolet Radiation	BCSYM1642
		Chemical Methods of Control: Disinfectants and Antiseptics	BCSYM1643
		Chemical Methods of Control: Antimicrobial Drugs	BCSYM1644
		Effectiveness of Hand Scrubbing	BCSYM1645
		Regulation of Gene Expression	BCSYM1646
		Isolation of Bacterial Mutants	BCSYM1647
		Transformation of Bacteria	BCSYM1648
		DNA Fingerprinting	BCSYM1649
		Genetic Engineering	BCSYM1650
		Ames Test for Detecting Possible Chemical Carcinogens	BCSYM1651
		Fungi: Yeasts and Molds	BCSYM1652
		Phototrophs: Algae and Cyanobacteria	BCSYM1653
		Protozoa	BCSYM1654
		Parasitic Helminths	BCSYM1655
		Isolation and Titration of Bacteriophages	BCSYM1656
